

2.4GHz Range Extender 5.5dBi Rubber Duck Antenna

The 5.5dBi Rubber Duck Antenna comes standard with all Gatecraft Beacon GCB-3xx products. It is only 7.75in in length and comes with connectors to the Gatecraft Beacon internal wireless card.

Features

- 5.5dBi Gain 2.4GHz Omni Directional Indoor Antenna
- Extends Range of 2.5GHz Wireless Access Points or Wireless Bridges

Description

This antenna is used to extend the range of indoor access points or client bridges in 802.11 2.4GHz wireless LAN environments. The antenna features a 360 degree horizontal transmission patter and a 50 degree vertical transmission patter. The transmit/receive element can be tilted in relation to the base to direct signal where it is needed (0, 45, 90 degrees).

Specifications

- 2400 – 2485MHz frequency range
- 5.5dBi gain
- 1.5:1 VSWR
- 50 Ohm impedance
- 10W input power
- -10°C to 70°C operating temperature (14°F to 158°F)
- 0.9oz (25g)
- 7.75 × 0.5 (D) in (197 × 12.7 (D) mm)
